

# ALL-IN-ONE DETECTORS

## OVERVIEW OF THE DIFFERENT MODELS

We also offer displays and PC interfaces which are integrated with the detector head. We offer three families of these all-in-one detectors. INTEGRA features either a USB or RS-232 output for a direct connection to your PC. BLU is available all our thermal power detectors and allows you to view and log power measurements on your mobile device or PC. PRONTO includes a display, so you have everything you need in a single, portable device.

### INTEGRA

The INTEGRA version of our standard laser power or energy detectors allows you to read your measurements directly on your PC thanks to our free proprietary software.

The small and powerful INTEGRA presents a direct USB or RS-232 connection so you can plug it into your PC or acquisition system. It is available for all levels of power and energy.

Simply carry your all-in-one detector and plug it in your PC any time you need to measure your laser power or energy. No need to buy a separate meter!

Watch out for the INTEGRA logo to identify the products available with INTEGRA.

See page **36**

### BLU

Our thermal power detectors (UP series) are available in their BLU version, which allows you to read your power measurement directly on your mobile phone or PC thanks to a Bluetooth connectivity.

You get the same high accuracy measurement without the need to connect any wires or to carry a separate acquisition & readout device. This solution is not only more practical, but also more economical compared to our other laser power measurement systems.

Watch out for the BLU logo to identify the products available with BLU

See page **38**

### PRONTO

Our PRONTO series is of high interest for those who need a laser measurement system that is portable and so compact that it fits in their pocket. These products can be handheld (for low power only) or placed on a stand like our standard detectors.

They are offered in four series:

- PRONTO-SI for laser power under 800 mW in the visible range
- PRONTO-250 and PRONTO-50 for broadband power measurement up to 250 W
- PRONTO High-Power for laser power measurement up to 10 000 W
- PRONTO-500-IPL for pulsed light measurement up to 35 J

These user-friendly products are so simple to use that anyone can start using them within seconds. They all offer data logging on their internal memory. Data can then be transferred to your PC via USB.

#### ■ PORTABLE, ALL-IN-ONE LASER POWER METERS
