

## InGaAs Avalanche Photodiode IAG-Series

### Description

The IAG-series avalanche photodiode is the largest commercially available InGaAs APD with high responsivity and extremely fast rise and fall times throughout the 1000 to 1630 nm wavelength range. The peak responsivity at 1550 nm is ideally suited to eye-safe rangefinding applications, free space optical communications, OTDR and high resolution Optical Coherence Tomography.

The chip is hermetically sealed in a modified TO-46 package. SMD and pigtailed options are also available.

### Features

- 80, 200 or 350  $\mu\text{m}$  active area
- Bandwidth up to 2.5 GHz
- Over 70% QE from 1000 to 1600 nm
- Low dark current & noise
- Modified TO-46 or ceramic submount
- Fiber-coupled versions available

### Applications

- Rangefinding
- Optical communication systems
- Optical coherence Tomography
- Low-light-level detection
